

LOW POLY HOUSE INTERIORS

Readme

Welcome, and thanks for purchasing the *Low poly house interiors pack*! This is a modular pack with lots of rooms, furniture and props to easily use in your own scenes.

Demo scenes and prefabs

There are several demo scenes with example rooms and lighting to help you get started. The assets are divided in several prefab folders: the room prefabs contain complete rooms filled with furniture and props, and you can find all the furniture and props separately in their prefab folder.

Future low poly packs

We are working on another pack with more interior styles and a pack with house and building exteriors.
